PROFESSIONAL EXPERIENCE

Software Developer Intern | Rodeo FX

July 2025 - May 2026

On-Site, Venice, CA

- Built and shipped AI-driven image and video tooling within a live, high-end VFX production pipeline
- Engineered custom Python/PyTorch ComfyUI nodes with API integrations, expanding generative AI capabilities and creative control for VFX artists
- Participated in strategic discussions with AI API providers to evaluate visual quality, integration, and production readiness
- Worked directly with artists to evaluate outputs against production standards, iterating quickly and prioritizing speed, usability, and creative flexibility

Innovation Pipeline Intern | AGBO Studios

June 2024 - Sept 2024

On-Site, Los Angeles, CA

- Built pipeline automation tools that supported and optimized animation workflows across multiple production teams
- Led research into emerging creative technologies and software, presenting findings directly to technical and executive leadership
- Developed automation solutions that meaningfully improved studio-wide production capabilities and operational efficiency
- Worked hands-on with Maya, Unreal Engine, Metahumans, Flow, and Rez in fast-paced, high-pressure production environments
- Built API integrations supporting production asset management and data tracking systems

Student Intern | Monolith Studios

Aug 2022 - Sept 2023

Hybrid, Los Angeles, CA

- Collaborated closely with leadership on LED Volume deployment for In-Camera VFX (ICVFX) implementations
- Worked hands-on with Unreal Engine-based real-time visualization technologies, supporting film production workflows
- Attended SIGGRAPH ('22, '23) conferences, tracking emerging media, entertainment, and production technologies

EDUCATION

Stanford University | Stanford, CA

Sept 2022 - June 2026

B.S. Computer Science, Visual Computing

- **Relevant Coursework:** Computer Graphics, Machine Learning, Computer Vision, Procedural Modeling, Software Development
- **Leadership:** *Outreach Chair,* Stanford Equestrian Team (2022–2024) – Led campus-wide initiatives, coordinated with faculty and students, and promoted equestrian education at Stanford.

SKILLS

Programming Languages: Python, C, C++, JavaScript

Digital Content Creation: Maya, Houdini, ComfyUI, Runway, Unreal Engine, Blender, Figma, Flow, Rez, Allzpark

Platforms: Github, AWS, Jira, GitLab, Notion, Zoom, Slack, Allzpark, Microsoft Office, Google Workspace

PROJECTS

- **2.5D Parallax Pipeline:** 2.5D reprojection pipeline producing camera-reactive parallax for LED volume stages, using monocular depth estimation, generative inpainting, and real-time Unreal Engine compositing. (Senior Project)
- **HandyReader:** Real-time ASL → English translation system using MediaPipe keypoints + GRU-based temporal modeling, with LLM post-processing for sentence-level output. (CS 231N)
